

Final Project Suggestions

Beginning System Administration Decal

Scripting Languages

- Webpage with user interaction to a server end services like a database
- A log tool that displays pertinent information from log files on a webpage
- Authentication
 - Ldap/kerberos
- Automated tasks – user creation, user software installation

Software

- Streaming audio/video (no copyrighted content!)
- Enabling alternate scripting languages to be executed by apache with suexec/cgi-wrap - perl, python, php
- IRC /eggdrop (security is a must here)
- Apache with ssl, Roundcube/mailserver
- SVN /Git
- Mailman with alternate userbase
